Abdul Rahman Adil

Full-Stack Developer | MERN

adilaadhy.dev@gmail.com | +91 7994931322 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer with three deployed production apps, including a real-time platform with **atomic order assignment**, a scheduler with a **BullMQ job queue**, and an e-commerce store with **Razorpay**. Works with **React, TypeScript, Node.js, MongoDB and PostgreSQL**, and deploys with **Docker, AWS and CI/CD**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, Zustand, React Router, React Hook Form, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT, BullMQ, Zod
Databases: MongoDB, Mongoose, PostgreSQL, Drizzle ORM, Redis
DevOps & Cloud: Docker, Nginx, AWS (EC2, S3), Vercel, GitHub Actions (CI/CD)
Tools & Services: Git, GitHub, Postman, Razorpay, Cloudinary, Nodemailer

PROJECTS

QuickKart — Hyperlocal Grocery & Delivery Platform | Live
React 19, TypeScript, Zustand, Tailwind CSS, Node.js, Express, MongoDB, Redis, Socket.IO, Razorpay, Leaflet, AWS, Vercel

- Built a four-role platform (customer, store, driver, admin) with **role-based access**, KYC onboarding and admin approval workflows, deployed on **Vercel and AWS**.
- Engineered real-time driver dispatch over **Socket.IO** with expanding search rings (5→8→10 km) and 30-second accept windows, using an **atomic findOneAndUpdate** so only one driver wins concurrent accepts.
- Modeled an **8-state order lifecycle** with live GPS tracking on **Leaflet** maps and a 75-second reconnect grace period so brief network drops don't take drivers offline.
- Designed a driver wallet with **T+1 settlement** (node-cron), four-tier **COD risk limits**, and **Razorpay** remittance with HMAC and webhook verification.

RevSlot — Project Review Scheduling Platform | Live
Next.js, TypeScript, Express, PostgreSQL, Drizzle ORM, Redis, BullMQ, Docker, Nginx, AWS EC2, GitHub Actions

- Built in a team **pnpm monorepo** (**Next.js** client, **Express** API) to replace WhatsApp-based coordination of external project reviews, with a public no-login booking flow, timezone-aware calendar and slot picker.
- Implemented availability and booking modules that generate slots in memory from weekly templates, date overrides, buffers and minimum-notice rules, with **conflict checks** across all of a reviewer's event types.
- Prevented double-booking with 5-minute **slot holds** using **PostgreSQL transactions** and unique constraints, and built cancel and reschedule flows with email notifications.
- Moved confirmation and reminder emails to a **BullMQ + Redis** worker with retries, and deployed with **Docker Compose** behind **Nginx** on **AWS EC2** with **GitHub Actions** CI/CD and daily **S3** backups.

FUTGEN — Football Apparel E-Commerce Platform | Live
React 19, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, Redis, Razorpay, Cloudinary, AWS EC2, Vercel

- Built a full-stack store with server-side pagination, search, filters, infinite scroll, a size-based cart and wishlist with stock checks, and an **admin dashboard** for product CRUD, orders and users.
- Optimized product catalog queries with MongoDB indexing and implemented stock-ceiling validation on cart quantities to prevent overselling.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern | **Bridgeon Skillversity** Sep 2025 – Present

- Built full-stack features in a team using **React, Next.js, TypeScript, Node.js, Express and MongoDB**, from database schema and REST API to reusable UI components.
- Implemented **JWT authentication** with access and refresh tokens, **Redux Toolkit** state management, and **Redis-backed OTP** verification.
- Integrated **Razorpay** payments, **Nodemailer** emails and file uploads, and debugged issues across the frontend and backend.
- Worked in an **Agile team of 4-6** with daily stand-ups, using **Git and GitHub**, and had projects reviewed weekly by **industry professionals**.

EDUCATION

Bachelor of Computer Application (BCA)
P A First Grade College, Mangalore University Sep 2022 – Jun 2025

CERTIFICATIONS

- Data Analytics — ISDC, in partnership with Institute of Analytics (IoA), UK, Jun 2025
- Data Science Internship — Zephyr Technologies and Solutions Pvt Ltd, Aug 2024
